- 1. An MVD fuel storage depot is located five kms. west of Soltsy (53-03N, 30-20E), north of the road to Pskov (57-50H, 23-20E). (See Sketch No. 1 attached) The fuel storage depot is in a forest and is well camouflaged.
- 2. The capacity of the storage depot is as follows:
  - a. 2h tanks in use, containing gasoline. Each has a storage capacity equal to that of four to five railway tank cars. These tanks protrude approximately two meters above ground and are covered with earth and grass.
  - b. 12 fuel tanks similar to those described above, under construction and nearly completed in December 1949.
  - c. 12 fuel tanks under construction. Tork had only just commenced on some of these and in December 1949 was at a standstill.
- 3. The fuel storage depot belongs to the MVD and is under with administration. Administrative personnel and guards number in all approximately 20 men and are accommodated in two buts.
- 4. The depot is surrounded by a barbed wire fence, patrolled by EVD guards.
- 5. West of the fenced-in area, excavation work was in progress in September 1949, which appeared to be in preparation for the building of further fuel tanks.
- 6. For lay-out of storage depot see Sketch No. 2 attached.
